

CALIFORNIA ENERGY COMMISSION | RENEWABLES

TRACKING PROGRESS

HIGHLIGHTS

AN ESTIMATED

34%

of California's electricity was produced from

RENEWABLE SOURCES IN 2018

Solar

is now the

#1

renewable energy resource,

PROVIDING **31%** OF CALIFORNIA'S RENEWABLE GENERATION

MORE THAN

1,000,000

SOLAR SYSTEMS

have been installed
on California homes,
businesses, and schools

Solar

will be included
on all

New Homes

starting in 2020

saving
customers

\$19,000

in energy and maintenance costs
over 30 years

California now has over

30,000 MW

of renewables installed,

a goal to achieve

100 PERCENT

clean electricity by 2045

enough to power **11 million** homes for a year
